12 ✨ Claude SEO/GEO Prompts You Need To Try Today!

#1

AI-Citation Friendly Article Restructure

Prompt -

I run a [industry/niche] website targeting [audience]. Analyze my article about [topic/keyword] and rewrite the introduction and first 3 H2 sections to directly answer questions in a citation-friendly format. Use this structure: Start each section with a clear question, provide a 2-3 sentence direct answer, then expand with supporting details, data, and examples. Highlight 3-5 key facts that AI models would extract as quotable snippets.

#2

AI Overview Optimized Pillar Article Creator

Prompt -

Create a 2000-word pillar article about **[main topic]** for my **[industry]** site that's optimized for AI Overview features. Structure it with: (1) A 100-word executive summary, (2) 8-10 H2s framed as questions, (3) Each section with a bold key takeaway, (4) 2-3 data points or statistics per section with **[source format you prefer]**, (5) A comparison table, (6) FAQ section with 5 questions. Target keyword: **[keyword]**. Secondary keywords: **[list 3-5]**.

#3

Existing Content to AI-Citation Magnet Transformer

Prompt -

Transform this existing blog post **[paste content or URL]** into an AI-citation magnet. Rewrite it to include: (1) Clear entity definitions for **[list main entities/terms]**, (2) Factual statements suitable for extraction (mark them in bold), (3) 'According to **[expert/study]**' attribution patterns, (4) Step-by-step processes in numbered format, (5) A quotable expert perspective section. Maintain the original tone but optimize for LLM citation.

#4

AI-Friendly Semantic Content Hub Architecture

Prompt -

My website is about [niche] with main categories: [list categories]. Create a semantic content hub architecture that AI crawlers can easily understand. Provide: (1) A visual hierarchy showing pillar pages and cluster content, (2) Internal linking patterns with anchor text suggestions, (3) Breadcrumb schema recommendations, (4) Entity relationship mapping between topics. Focus on making [main keyword] the central authoritative topic.

#5

Conversational AI Query Generator

Prompt -

I'm in the [industry] business targeting [audience] interested in [main topic]. Generate 25 conversational queries that users ask AI chatbots (not traditional search engines) related to [keyword category]. Format them as: (1) Question-based queries, (2) 'How to' requests, (3) Comparison questions, (4) Problem-solution queries. For each, indicate: search intent (informational/commercial/transactional), difficulty to rank, and content format needed (guide/listicle/comparison/tutorial).

#6

Entity-Based SEO Opportunity Research

Prompt -

Research entity-based SEO opportunities for [topic/keyword]. Identify: (1) Primary entities AI models associate with this topic, (2) Secondary entities and attributes, (3) Entity relationships that strengthen topical relevance, (4) Gaps in my existing content about [your current coverage], (5) 10 entity-optimized content ideas that fill these gaps. Present as a table with entity, relationship type, and content angle.

#7

People Also Ask Section Generator

Prompt -

Generate a 'People Also Ask' content section targeting [main keyword]. Research actual PAA questions from Google and AI Overview results. Create: (1) 10 related questions in order of user intent progression, (2) For each: a 75-100 word answer optimized for direct citation, (3) Related keywords to naturally include, (4) Suggested schema markup for each Q&A pair. Write in a confident, authoritative tone that positions my site as the expert source.

#8

Brand Entity Profile Optimization Plan

Prompt -

Build a brand entity profile optimization plan for [brand/company name] in the [industry] space. Deliverables: (1) Wikipedia-style infobox with key facts, (2) Consistent NAP (Name, Address, Phone) format for all platforms, (3) Knowledge graph optimization checklist, (4) Brand mention strategy (where and how to get mentioned), (5) Structured data for Organization schema including: founding date, founders, services, awards. Make us recognizable to AI models as the authority on [specific topics].

#9

Original Research Content Strategy

Prompt -

Create an original research content strategy to become the cited source for **[topic]** in AI results. Plan 3 content pieces: (1) Original survey/study about **[specific angle]** - include methodology, sample questions, and data visualization ideas, (2) Industry statistics compilation for **[year]** with 20-30 unique data points, (3) Expert roundup featuring insights from **[number]** professionals about **[specific question]**. For each, outline: promotion strategy, schema markup, and citation-worthy elements.

#10

Competitor AI Citation Analysis

Prompt -

Analyze why [competitor URL 1], [competitor URL 2], and [competitor URL 3] are being cited by AI tools for '[target keyword]'. For each competitor, document: (1) Content structure and format, (2) Types of data/statistics included, (3) Schema markup they use (check their source code), (4) Authority signals (author credentials, citations, backlinks), (5) Unique angles or insights. Then create an action plan: What I must replicate, what I can do better, and what unique value I can add. Present as a competitive matrix.

#11

AI Citation Tracking System Designer

Prompt -

Design a tracking system to monitor AI citations for my website **[domain]** across ChatGPT, Perplexity, Google AI Overviews, and Bing Copilot. For my target keywords: **[list 5-10 keywords]**, create: (1) A testing protocol (what questions to ask each AI tool), (2) Metrics to track (citation frequency, context, competing sources), (3) A monthly tracking spreadsheet template, (4) Optimization triggers (when to update content based on citation patterns), (5) Improvement checklist when we're not being cited. Make it actionable for a non-technical marketer.

#12

90-Day AIO Optimization Roadmap

Prompt -

Build a 90-day AIO (AI Optimization) roadmap for my [niche] website [domain]. Current state: [describe traffic, content quantity, main topics]. Goals: [increase AI citations, appear in AI Overviews for X keywords]. Create a week-by-week plan including: Week 1-2 (audit and research), Week 3-4 (schema implementation), Week 5-8 (content optimization - specify which pages), Week 9-10 (new AI-optimized content - topics), Week 11-12 (authority building and monitoring). For each phase: specific tasks, required resources, success metrics, and deliverables.
